AI Evolution

Face Recognition

We uses face recognition artificial technology to make business process simpler and more efficient.

We have adopted the technology on photograph selection and entry access, benefiting the tourism industry and businesses.

See how face recognition changes the norm!

Photography
No more tagging of photographs with guest. Yet the guest can find their photographs for purchase at the end of the day.

Entry Access
Bio authentication on guest so as to allow them to self-service and gain entry in a contactless way.

Customizable
Our software ownership allow us to customize the solution to fit and integrate with your business processes.
